Nat'l Wine and Cheese Day bugfixes

Last Modified on 10/21/2025 3:20 pm EDT

As if I ever need an excuse to enjoy more cheese; imagine my delight learning it was National Wine and Cheese Day!

To celebrate, we recommend this pairing of bugfixes:

- When an author using the Legacy Editor viewed the snippet Code Editor, they were getting an infinite spinner. This was an accidental consequence of our Behind the scenes updates. We've fixed it now. This bugfix has a full-bodied fruity flavor with notes of chocolate and cherry.
- For knowledge bases using the Minimalist theme: we've made a small accessibility improvement to this theme. We've added aria-labels to the table of contents menu when it's open and closed to make it more accessible to screen readers and end-users who are navigating via keyboard. You don't need to make any updates to your knowledge base; we're applying these automatically. This is a creamy, pungent bugfix with a tangy finish.
