

September 27th: SMTP changes and Microsoft OAuth2 SMTP

Last Modified on 09/18/2023 3:58 pm EDT

Details for our next session:

- **Day:** Wednesday, September 27th
- **Time:** 2:00-2:30pm EDT
- **Link:** <https://meet.google.com/jmb-ducm-yjb>
- **Eventbrite link:** You're not required to register, but if you live and die by your calendar and want some reminders about it, you can sign up here: <https://www.eventbrite.com/e/wisdom-wednesday-smtp-changes-and-microsoft-oauth2-smtp-tickets-721567145757>
 - Anyone who signs up will get a personal email with the link to the recording after the fact, too!
- **Topic:** This session will cover two recent major changes to our SMTP configurations: removing the configuration portion from individual knowledge bases into Your Account > SMTP so they can be reused, and adding support for Microsoft OAuth2 SMTP. This will include:
 - A basic overview of why we made the changes we made and what--if anything--you should do with your SMTP services.
 - For those of you using Microsoft in your SMTP, we'll talk a bit about what transitioning to OAuth2 looks like and what you'll need to talk to your IT admin about to get it set up.
