Generate a version PDF

Last modified on 08/18/2026 4:47 pm EDT

PDFs for the current live article are generated and updated automatically when you publish an article or save changes to a published article.

But what about versions?

If you use the **Preview access** or **Make Visible to Groups** section to make a version visible to groups, as outlined in Version review process for readers, the PDF icon isn't visible when a member of that group views the version.

Instead, you can generate a PDF of a version from within the article editor. Version PDFs are available for 24 hours from the moment you generate them or until you save new changes to the version, whichever comes first. You are welcome to download and save the version PDF, share that download with anyone else who might not have access to KnowledgeOwl, or just use it as a record of what a version looked like at a given time.

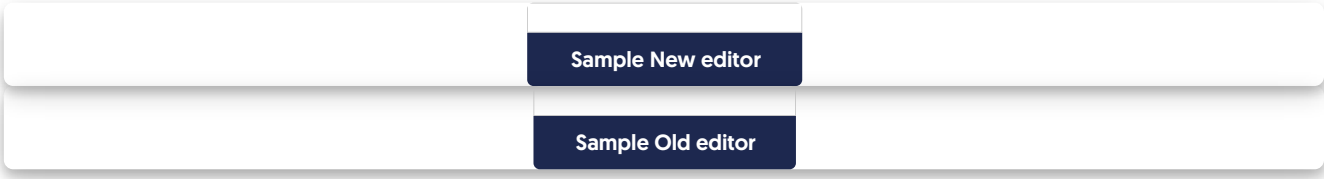

Generate a version PDF

The information below varies based on whether you're using our 2026 new editor or old editor.

To figure out which instructions to follow:

1. Open any article for editing.
2. If the lefthand navigation is collapsed and there's a link near the top of the page to **Switch to old editor**, follow the **New editor** documentation.
3. If the lefthand navigation is expanded and the top of the editor and the righthand column have a heavier grey background, follow the **Old editor** documentation.

Here are side-by-side examples of the new editor and the old editor:

Try out the new editor
We'd love your feedback on the new editor. To switch to the new editor, open any article for editing and select the **Switch to new editor** link at the top of the editor.
