

File size limits

Last Modified on 06/10/2026 1:51 pm EDT

You can upload as many files to your knowledge base as you'd like, but we do have one limit:

200MB or less

Files uploaded to KnowledgeOwl and stored in Files cannot exceed 200MB.

If you try to upload files larger than this, you'll receive an error during the upload process.

For files larger than 200MB, we recommend using a third-party file or video-hosting service.

Use that service's options to embed the file within KnowledgeOwl or set up [URL redirect articles](#) or [categories](#) to direct people to the files.
