

☒ Int'l Human Solidarity Day bugfixes

Last Modified on 12/21/2023 10:08 am EST

We're very close to releasing the facelift to the article editor righthand column! 🌐

While we finish up the last few tweaks on that, we released fixes for the following bugs:

- We discovered that updating the [Contact Form](#) Form Submitted Body field wasn't always actually displaying those changes. We've fixed it so that those changes do show.
- We had reports of a 500 error when trying to access the [Modern Slideout Help Widget](#). We fixed those, though as a reminder: we have [deprecated the Modern and Legacy widgets](#), so we don't generally test those widgets for bugs and won't be adding any new changes to them. Consider switching to [Widget 2.0](#) if you're still using one of these older widgets. 😊 (In this case, the 500 error made the old widgets totally unusable, which definitely counts as "the most dire of bugs", so we did fix it!)

This update includes security patches.
