

In-app version review process, custom content categories

Last Modified on 06/12/2024 2:14 pm EDT

If you'd like other KnowledgeOwl authors with access to the editor to review your custom content category version, you can mark versions as **Ready for review**. Since custom content categories do not show up in **Manage**, though, you'll need to figure out some other workflow for notifying other authors that the category's version is ready for review.

To mark a custom content category version as ready for review:

1. Be sure you have the correct version open in the category editor.
2. Check the box next to **Ready for review** in the **Version Status** section.
3. Then **Save**.

This will add a **Ready** badge to the version:

Active Version: 1.00

All Versions:

1.01 READY VIEWING

1.00 PUBLISHED

[Create a new version](#)

Version Note:

Updated with screenshots from live demo environment. -KM

Should we add a gif of the UI behavior on resize? -MA

Version "READY" badge

Reviewing authors can add feedback in the [Version Notes](#) field, make edits themselves, or [activate the version](#).

Have multiple versions ready for review that you'd like to activate? You can [activate versions marked Ready for review in bulk](#) using the [Manage articles bulk editing](#) interface and this same filter!
