

Readd the Related Articles section to my articles

Last Modified on 11/13/2025 1:33 pm EST

If you have a customized theme, the Related Articles section might have been removed entirely.

If that's the case, update **Customize > Style (HTML & CSS) > Custom HTML > Article** with the Related Articles merge code to revive it.

Copy and paste the Related Articles HTML from [Default Article HTML](#), rows 15-18 where you'd like the Related Articles list to reappear.
