

Change the location of the Ratings section

Last Modified on 01/10/2025 11:42 am EST

The **Ratings** section displays in the footer of your articles.

If you'd like to move it around, head to **Customize > Style (Custom HTML & CSS) > Customize HTML, CSS, and JS > Custom HTML > Article**. The `[template("ratings")]` merge code sets where the ratings section displays. It's usually on or around row 19 of **Article Custom HTML**:

```
<div class="hg-article-footer clear-both">
  <div class="ko-related-articles text-center">
    <h3>[translation("article:related-articles-heading")]</h3>
    [template("related")]
  </div>
  [template("rating")]
  [template("comments")]
</div>
</div>
```

Move the template merge code where you'd like the Ratings section to appear and then **Save**.
