

# Set up search

Last Modified on 02/11/2025 12:25 pm EST

While you can change search settings at any time, if you're setting search up in a new knowledge base, we recommend following this approach:

1. Edit the [General settings](#).
  2. Edit any [default text](#) you'd like.
  3. Adjust the search [Fine tuning](#).
  4. Consider adding [Synonyms](#).
