

# Review search results

Last Modified on 04/30/2026 1:14 pm EDT

Learn how to review your Find and replace search results in table or CSV export form.

## Find and replace results table

The results table appears below the Replace section after you run a search

The table displays all content returned by your search, displaying their Name, Type, Status, Parent category, Author (for articles only), Modified by (author), and View live link.

It displays 20 results per page. Use the Next and Previous controls at the bottom to paginate through the list.

As with the [Manage articles](#) table, select a title in this table to open it for editing in a new browser tab.

## Find and replace CSV download

For a slightly more detailed output of all search results without having to page through them, use the **Download as CSV** option.

The Find and replace CSV download contains 9 columns:

- **Object ID:** A unique identifier used to identify every object in your knowledge base. You can generally ignore this column.
- **Object Type:** Find and replace returns both articles and custom content categories by default. This column identifies what portion of your knowledge base this match came from. Options include:
  - Article
  - Category
  - Homepage (Customize > Homepage)
  - Snippet
  - Theme (Customize > Style)
- **Title:** The title of the object. For articles, categories, and snippets, this displays the title you've defined. For Homepage, this just displays Homepage. For Theme, this displays which portion of the Theme the result came from, for example Theme: Body means the result was found in the Custom HTML Body template within Customize > Style.
- **Edit Link:** A link to jump directly to the content within app.knowledgeowl.com.
- **View Link:** A link to view the content in your live knowledge base.
- **Parent Category:** The title of an article or category's immediate parent category. Listed as N/A if it's a top-level article or category or another content type.
- **Status:** For articles, this displays the Publishing Status. For categories and snippets, this displays "active".

[Deleted categories aren't searched]. Listed as N/A for Homepage and Theme.

- **Author:** The first and last name of the officially-identified author for the article. Listed as N/A for categories, snippets, homepage, and theme since they have no listed author.
  - **Last Modified Author:** The first and last name of the author who last saved changes to this article or category.
-
