Review Advanced search results

Last Modified on 04/02/2025 11:53 am EDT

Learn how to review your results in table or CSV export form.

Advanced search Results table

The Results table displays in the section below your search **Filters**.

The table displays all articles and custom content categories returned by your search, displaying their **Name, Status, Category, Visibility, Author** (for articles only), **Last Modified** date, and **Date Created**.

It displays 20 results per page. Use the pagination controls at the bottom to paginate through the list.

As with the **Manage articles** table, you can select an article or category title in this table to open it for editing in a new browser tab.

> **No object type column**
> This format doesn't make any visible distinction between articles and custom content categories.

Advanced search CSV download

For a slightly more detailed output of all search results without having to page through them, use the **Download as CSV** option.

The Advanced search CSV download contains 9 columns:
- **Object ID:** A unique identifier used to identify every object in your knowledge base. You can generally ignore this column.
- **Object Type:** Advanced search returns both articles and custom content categories. This column identifies whether the result returned is from an Article or a Category.
- **Title:** The title of the article or category.
- **Edit Link:** A link to jump directly to the article or category within app.knowledgeowl.com.
- **View Link:** A link to view the article or category in your live knowledge base.
- **Parent Category:** The title of the article or category's immediate parent category. Listed as N/A if it's a top-level article or category.
- **Status:** For articles, this displays the Publishing Status. For categories, this displays "active". (Deleted categories aren't searched).
- **Author:** The first and last name of the officially-identified author for the article. Listed as N/A for categories,

since they have no listed author.

- **Last Modified Author:** The first and last name of the author who last saved changes to this article or category.
