# Supported file types

**Last Modified on 06/12/2025 2:11 pm EDT**

**You may upload any file type into KnowledgeOwl, including but not limited to:**

- **Images (.jpeg, .jpg, .png, .webp, .svg)**
- **Video**
- **Audio**
- **PDFs**
- **Word documents**
- **Excel spreadsheets**
- **CSV files**
- **Zip files**
- **Executable code files, such as .js, .php, .bat**

## Executable files

**We handle executable code files correctly and store them in non-executable storage, not on our application servers. Most executable files are stored for download-only and won't be executed, with one exception: Javascript (.js) files.**

**We will execute Javascript (.js) files that are used somewhere to add functionality to your knowledge base, such as added to Customize > Style (HTML & CSS) > Custom Head, stored in Snippets, and so on.**
