

Create a style guide

Last Modified on 10/03/2025 10:49 am EDT

How to create a style guide

Go to **KB settings > Style guide** and select **Create style guide**. Write your guidelines using the rich-text editor (up to 5,000 characters) or select **Start from a sample** to begin with a template. You can write comprehensive guidelines from scratch, reference existing style guides and note exceptions, or customize the sample template.

Getting started

If you're not sure where to start with your style guide, check out our [Style guide starters](#) article for style guide templates and tips on adapting established style guides.
