Turn on access to AI content style guide reviews

Last Modified on 10/09/2025 4:18 pm EDT

To allow all authors to Use AI to review article content with your style guide:

1. Go to **Account > Owl Intelligence.**
2. Select the **AI authoring tools** box to **Allow authors to use AI to check article content against your style guide** to enable AI-powered style guide reviews for all authors.
3. Be sure to **Save** your changes.

If you're using custom author roles, you can give those roles permission to run AI style guide reviews by adding the **Owl Intelligence** permission to **Check article content against the style guide using AI**.
