

Style guide access controls

Last Modified on 10/03/2025 10:55 am EDT

To control which authors can use Style guide features, configure the following settings:

In **Account > Owl Intelligence**, select the **Allow authors to use AI to check article content against your style guide** checkbox to enable AI-powered style guide reviews for all authors.

You can also create [custom author roles](#) to granularly control which Style guide features individual authors can use:

- **Check article content against the style guide using AI** - Allows the author to use AI to review articles against the style guide
 - **Update style guide settings** - Allows the author to edit the style guide in KB settings
-
