Generate articles with style guide

Last Modified on 10/08/2025 12:07 pm EDT

You can also apply your style guide when you generate new article content with AI:

1. In the **Generate article content using AI** modal, make sure the **Give AI your style guide to improve consistency** box to **Apply style guide** is checked before you generate content.
2. Owl Intelligence creates content that follows your style guide, which should reduce the need for later revisions.
