# Delete Export API tokens

Last Modified on 03/18/2026 5:18 pm EDT

Authors with the default Editor role can update Owl Analytics settings, including creating and deleting Export API tokens. If you're using a custom role, you'll need to have the **KB Settings** custom author role permission to **Update analytics settings.**

If your Export API token has been compromised or you have some other reason you no longer need it, delete the token:

1. Go to **KB settings > Owl Analytics**. The Owl Analytics settings page opens.

2. In **Export API** in the **Quick start** section, select the trashcan icon next to the token you wish to delete:

   Select the trashcan icon next to the token you wish to delete

   The **Delete API token** modal opens.

3. Verify that the token shown in the modal is the one you wish to delete. If it is, enter delete in the textbox.

4. Select **OK** to complete the deletion.

> ⚠️ **Immediate loss of access account-wide**
> The export token will stop working for all knowledge bases across your account as soon as you delete it.
