

Turn off comments for specific articles

Last Modified on 04/01/2026 5:22 pm EDT

Your KnowledgeOwl knowledge base comes with comments turned on across the knowledge base. New articles will automatically have comments turned on.

You can disable comments for certain articles. This action removes the comments section from the article completely. To do so:

1. Open the article for editing.
2. In the **Display Settings** section, check the box to **Remove comment ability**.

Check the box to Remove comment
ability

3. Be sure to **Save** your article changes.

The comments section won't be shown in this article. Refer to [Display Settings](#) for more information about the other settings in this section.

If you'd prefer to disable comments completely across your entire knowledge base, refer to the instructions in [Turn off comments in your knowledge base](#).
