

# What content fields are replaced

Last Modified on 04/30/2026 3:26 pm EDT

Here are the content fields that find and replace can update as part of replace jobs:

## Article replace jobs

In article replace jobs, find and replace currently updates:

- Article title (also known as the Full Article Title in the old article editor)
- All occurrences of the search phrase in your article's body (the contents of the editor)

Replace jobs currently won't update occurrences of the searched phrase in these article fields:

- Internal title
- Short title
- Title tag
- Permalink
- Summary (also known as the Meta Description in the old article editor)
- Tags
- Search phrase
- Author note (also known as Internal note in the old article editor)

## Category replace jobs

In custom content category replace jobs, find and replace currently updates:

- Full Category Title
- All occurrences of the search phrase in your custom content category's body (the contents of the editor)

Replace jobs currently won't update occurrences of the searched phrase in these custom content category fields:

- Short Category Title
- Internal Category Title
- Internal Note
- Category Description
- Title Tag
- Meta Description

## Homepage replace jobs

In homepage replace jobs, find and replace currently updates these fields in **Customize > Homepage**:

- Title
- All occurrences of the search phrase in your Custom content body (the contents of the editor)

Replace jobs currently won't update occurrences of the searched phrase in these Homepage fields:

- Meta title
- Meta description

## Snippet replace jobs

In snippet replace jobs, find and replace currently updates:

- Snippet Name
- Snippet Content

Replace jobs currently won't update occurrences of the searched phrase in these snippet fields:

- Merge Code Name
- Merge Code Value
- Snippet Description
