

Report options

Last modified on 07/22/2026 1:45 pm EDT

The URL checker defaults to including only links with a **Broken** or **Review** result. Refer to [How to read the URL checker links report](#) for more information on these results.

Use the **Report options** checkbox to **Include links with no issues in the report** if you'd like to include all links across your knowledge base:

☐

Most often, authors use this option to perform a comprehensive audit on all links.
