SOC 2

Last modified on 11/13/2026 11:28 am EST

KnowledgeOwl is currently pursuing a SOC 2 audit. We have selected our compliance platform and independent auditor, and we are now preparing for the audit. We will update this page as it progresses.

SOC 2 is an attestation report rather than a certification, so there is no badge or certificate to issue. We will share the report once it is complete.

In the meantime, here is what is already in place:

- Written security policies, reviewed annually
- Third-party penetration testing every year
- Disaster recovery tabletop exercises
- PCI-A compliance
- A full CAIQ self-assessment published in the Cloud Security Alliance STAR Registry, free for you or your security team to download today

If SOC 2 is something you have been waiting on, contact us and we will let you know when the report is complete.
