Can I use the KnowledgeOwl icon or logo?

Last modified on 11/19/2026 2:08 pm EST

Context

You want to use the KnowledgeOwl owl icon, our logo, or our owl mascot, Linus. You might want Linus in your own knowledge base, KnowledgeOwl in an internal list of tools or training materials, or our logo on a page that mentions KnowledgeOwl.

Or you might mean an icon your knowledge base already shows: the icon in the browser tab, the logo in your header, or the small owl in the "Made with KnowledgeOwl" footer. This applies to every plan.

Resolution

Yes! We're delighted when people use Linus in their knowledge bases.

- **Use our official logos:** Download them in SVG and PNG from KnowledgeOwl on Brandfetch. If you need a different size or format, email support@knowledgeowl.com.
- **Make Linus your own:** You're welcome to change Linus's colors or style to match your brand.
- **Show us (optional):** We love it when people have fun with our brand, so we'd love to see your Linus, or your own mascot. Send it to support@knowledgeowl.com.

To add Linus to an article, upload the image like any other. Refer to Add images to articles.

If you meant an icon your knowledge base already shows:

- **The icon in the browser tab (favicon):** By default, your knowledge base shows a document icon. To use your own, Linus included, go to **Customize > Style (HTML & CSS)** and select **Favicon**. Refer to Change your favicon.
- **The logo in your header:** Refer to Choose your logo.
- **The owl in your footer:** Knowledge bases created from scratch show "Made with KnowledgeOwl" and a small owl icon in the footer. You can keep it, and we'd love that, or remove it. Refer to Remove "Made with KnowledgeOwl" statement from footer.
